

BE-GE

BE-GE 8018

BE-GE 8018 is a mechanical suspended seat especially designed for reach trucks or similar vehicles with limited cab space, which is built to be driven on smooth floors. By placing the suspension unit behind the seat's backrest, the built in height becomes very low but without decreasing the seats comfort. The seat has simple and ergonomically placed controls for weight adjustment, back adjustment and length adjustment.

Be-Ge 8018 is available with both low and high backrest, the high version is with advantage used in combination with headrest for even more increased comfort during long working phases and is already as standard equipped with adjustable lumbar support.

Standards:

IT 1

EN 13490

FMVSS 302, ISO 3795, 76/115/EEC

BE-GE 8018

BE-GE 8018 is a mechanical suspended seat with the suspension unit placed behind the backrest and 50 mm suspension.

Weight adjustment is made via the front of the seat and can be adjusted between 45-130 kg.

Options:

The seats can be equipped with 24/48V electrical heating, 2-point safety belt and armrests. The low back can be equipped with manual operated air controlled lumbar support which is standard in high backrest, option for low backrest.
